

ABHISHEK CHAUDHARY DATA SCIENCE | AI/ML

 abhishekchaudhary8275@gmail.com  7455918275  New Delhi-110017  LinkedIn  GitHub

PROFESSIONAL SUMMARY

MCA graduate focused on Data Science and Machine Learning, with practical exposure to analyzing data and developing predictive models. Skilled in Python and SQL, with working knowledge of Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Matplotlib, and Seaborn. Developed projects covering fraud detection, and medical image classification, applying data cleaning, EDA, supervised learning, CNNs, and model evaluation. Seeking an entry-level Data Science, Machine Learning, or AI/ML role to apply my technical foundation to practical problems.

TECHNICAL SKILLS

Programming: Python, SQL.

Data Science & Analysis: Data Cleaning & Preprocessing, EDA, Feature Engineering, Statistical Analysis, Data Visualization

Machine Learning: Regression, Classification, Scikit-learn, Model Evaluation, Hyperparameter Tuning

Deep Learning: ANN, CNN, RNN, LSTM, GRU, Transformers & NLP

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras

Tools: Git, GitHub, Jupyter Notebook, VS Code, Streamlit, Google Colab, Power BI

PROJECTS

- MedVision AI — Medical Image Classification**  , Python | TensorFlow | Keras | CNN | Transfer Learning | MLflow
- Built a CNN-based medical image classification system using deep learning and transfer learning.
 - Developed a leakage-aware data pipeline for image preprocessing and train-validation-test splitting.
 - Trained and evaluated models using MLflow to track experiments, metrics, and model artifacts.
 - Built reusable inference and explainability pipelines for prediction and confidence analysis.
- Fraud Detection — Credit Card Fraud Detection**  , Python | Pandas | NumPy | Scikit-learn | SMOTE | SHAP | XGBoost
- Built a machine learning classification model to detect potentially fraudulent transactions.
 - Performed data cleaning, preprocessing, EDA, and feature engineering on transaction data.
 - Trained and evaluated classification models to distinguish fraudulent and legitimate transactions.
 - Analyzed model predictions using classification metrics to assess fraud detection performance.
- Telecom Customer Churn Prediction**  , Python | Pandas | NumPy | Matplotlib | Scikit-learn | Classification
- Built a machine learning classification model to predict customer churn from telecom data.
 - Performed EDA, missing-value handling, data preprocessing, and feature engineering.
 - Trained and evaluated ML models to identify customers likely to churn.
 - Analyzed churn patterns and model predictions to understand customer retention factors.

PROFESSIONAL TRAINING

- Artificial Intelligence and Data Science Program with Generative AI**, Madrid Software Saket, Delhi
- Hands-on training in Data Analytics, Machine Learning, Natural Language Processing, and Deep Learning.
 - Applied Python, SQL, Pandas, Scikit-learn, TensorFlow, and Keras to data analysis and machine learning workflows.
 - Practiced data preprocessing, exploratory data analysis, feature engineering, model development, evaluation, and visualization using real-world datasets.
 - Developed practical understanding of machine learning algorithms, neural networks, CNNs, RNNs, and NLP techniques.

EDUCATION

- Master of Computer Applications (MCA)** 2022 – 2024 | Ghaziabad, U.P.
KIET Group of Institutions
- Bachelor of Science (B.Sc - PCM)** 2019 – 2022 | Agra, U.P.
Dr. Bhim Rao Ambedkar University
